Thank you for purchasing Titan FTP Server®.

The following instructions will help you to set up IE7 for use with Titan FTP Server. If you need additional assistance the [Titan FTP User Guide](#) is available online. Also, a listing of Frequently Asked Questions (FAQ) is available at our [Knowledgebase Support Center](#).

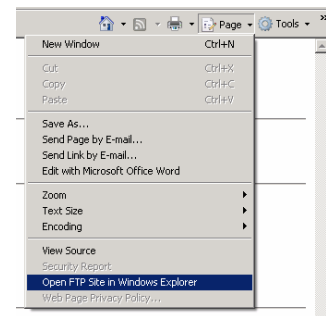

**Please Note:** Some screens in this instruction may contain options that do not pertain to configuring IE7 for use with Titan FTP Server. If you need additional information regarding these steps, please see the [Titan FTP User Guide](#).

## Configuring your Browser

1. Launch your Internet Explorer browser. From the **Tools** menu, select **Internet Options**. Click the **Advanced** tab and select **Enable FTP Folder view (outside of Internet Explorer)**. Click **OK**.

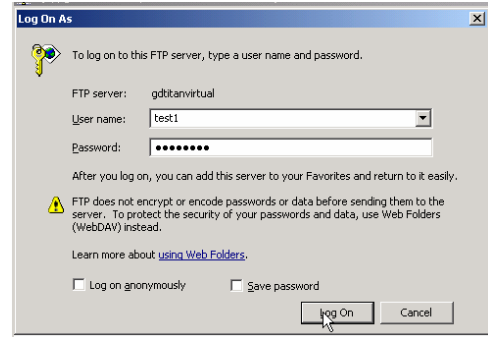

2. Type in your FTP URL into your browser's address bar. For example, **ftp://ipaddress** or **ftp://servername**. Click the **Page** drop-down menu and choose **Open FTP Site in Windows Explorer**.

3. From the **File** Menu, choose **Login As...**

4. Type your logon information. Make sure that Log on anonymously is not selected. Click **Log On**.

5. Drag and drop files as needed.

## About South River Technologies

South River Technologies (SRT) is an innovator in managed file transfer and document collaboration software. SRT's software seamlessly integrates access to remote files into the desktop applications that users rely on, creating an instantly familiar interface for collaborating, sharing, and accessing files. SRT's enterprise class server products are built using industry standard encryption, highly granular security configuration controls, and technologies to reduce the risk of network intrusions. Over 60,000 customers, including more than 70 colleges and universities, government agencies such as NASA and FAA, and other blue chip companies in more than 110 countries rely on SRT's software to make remote file access and collaboration more efficient for their customers, partners, and distributed workforce.
